

regression models for categorical dependent variables - *regression models for categorical dependent variables using stata third edition* shows how to use stata to fit and interpret regression models for categorical data the third edition is a complete rewrite of the book *factor variables and the margins command* changed how the effects of variables can be estimated and interpreted in addition the authors views on interpretation have evolved, **when dependent variables are not fit for linear models** - when your dependent variable is not continuous unbounded and measured on an interval or ratio scale your model will never meet the assumptions of the general linear model *glm* today i m going to go into more detail about these 6 common types of dependent variables and the tests that work, **proportions as dependent variable in regression which type** - when the dependent variable in a regression model is a proportion or a percentage it can be tricky to decide on the appropriate way to model it the big problem with ordinary linear regression is that the model can predict values that aren't possible values below 0 or above 1 but the other, **a handbook of statistical analyses using stata ucm** - constantly kept up to date with recent developments not just by its own developers but also by a very active stata community this handbook follows the format of its two predecessors a hand book of statistical analysis using s plus and a handbook of statistical analysis using sas, **glossary of research economics econterms** - box and cox 1964 developed the transformation estimation of any box cox parameters is by maximum likelihood box and cox 1964 offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates and the transformation identified this, **basic econometrics 5th edition by damodar n gujarati** - the first edition of basic econometrics was published thirty years ago over the years there have been important developments in the theory and practice of econometrics in each of the subsequent editions i have tried to incorporate the major, **interactive statistical calculation pages** - free statistical software this page contains links to free software packages that you can download and install on your computer for stand alone offline non internet computing
