

a spacetime map of the universe implications for cosmology - a spacetime map of the universe which shows the observer's position with respect to the cosmos and discusses cosmology the nature of space time and reality, **the electric universe the thunderbolts project** - the electric universe by wal thornhill we live in an electric world our cities are visible from space at night blazing with electric lights the electricity courses invisibly in the darkness over great distances along thin power lines, **no big bang quantum equation predicts universe has no** - this is an artist's concept of the metric expansion of space where space including hypothetical non observable portions of the universe is represented at each time by the circular sections, **is the universe closed mathpages** - 7 1 is the universe closed the unboundedness of space has a greater empirical certainty than any experience of the external world but its infinitude does not in any way follow from this quite the contrary, **the human connection physical and metaphysical** - we have reviewed the physical evidence for matter's connection to spacetime and the universe see nature's fractal pathway we found multiple linkages between spacetime and matter of which the most familiar are light time inertia and gravitation, **where does gravity come from universe today** - to be honest we're not entirely sure graphic courtesy university of tennessee knoxville we know from isaac newton and his law of gravitation that any two objects in the universe exert a force
